## PROFESSIONAL PROFILE

---

AI Engineer and Full-Stack Developer with practical experience building web, mobile, AI, and backend systems. Comfortable working across the full development process, from designing user interfaces and APIs to database design, authentication, machine learning integration, and deployment. My work includes AI-powered document analysis, machine learning-based software risk prediction, multi-tenant SaaS applications, and payment systems. I enjoy solving technical problems, learning new technologies, and turning ideas into working software.

## TECHNICAL SKILLS

---

**Programming:** Python, JavaScript, TypeScript, Java, C++

**Frontend:** React.js, React Native, Tailwind CSS, Electron.js, Responsive Web Design

**Backend:** Node.js, Express.js, Spring Boot, FastAPI, REST APIs

**Databases:** PostgreSQL, MySQL, MongoDB, MongoDB Atlas

**AI & Machine Learning:** Scikit-Learn, Random Forest, Natural Language Processing (NLP), OpenAI API, Predictive Analytics

**Security & Architecture:** JWT Authentication, Role-Based Access Control (RBAC), Multi-Tenant Architecture, Microservices

**DevOps & Tools:** Docker, Docker Compose, Redis, Git, API Integration, Containerized Deployment

**Other:** Data Structures & Algorithms, System Design, Database Design, Software Architecture

## PROFESSIONAL EXPERIENCE

---

**FULL-STACK & MOBILE INTERN** | Technical Hub Pvt Ltd | May 2026 – June 2026

- Developed responsive web and cross-platform mobile applications using React Native and modern JavaScript technologies.
- Connected frontend applications with backend services and REST APIs.
- Worked on responsive interfaces with attention to usability and application performance.
- Assisted with backend integration and end-to-end application development.
- Worked as part of a development team using modern software development practices.

**FULL-STACK TRAINEE** | Technical Hub Pvt Ltd | May 2025 – June 2025

- Built web applications from the ground up as part of full-stack development training.

- Worked with frontend, backend, APIs, databases, authentication, and responsive UI development.
- Developed interactive applications using modern web development frameworks.
- Practised designing application structure and connecting frontend components to backend services.
- Gained practical experience with the development and deployment process.

## SELECTED PROJECTS

---

### **POLICYGUARD AI** — AI / Legal Technology

**Tech:** React.js, React Native, Electron.js, Node.js, Express.js, MongoDB Atlas, OpenAI API, NLP, Docker, JWT

- Built an AI-powered application for reviewing privacy policies and legal contracts.
- Developed NLP workflows to extract relevant information from documents.
- Added automated risk detection to identify potentially problematic clauses and terms.
- Integrated the OpenAI API to generate explanations and risk-related insights.
- Designed the application to run across web, mobile, and desktop environments.
- Implemented authentication and containerized the application using Docker.

### **SOFTWARE RELEASE RISK HEATMAP** — Machine Learning / Software Development

**Tech:** React.js, TypeScript, Python, FastAPI, Scikit-Learn, PostgreSQL, Tailwind CSS

- Developed a machine learning platform for assessing software release risk.
- Trained a Random Forest classifier to classify releases according to stability and risk levels.
- Built a dashboard that displays release risks using an interactive heatmap.
- Developed FastAPI services to connect the machine learning model with the frontend.
- Used PostgreSQL for storing and managing application and release data.
- Built the frontend with React and TypeScript for a responsive user experience.

### **MULTI-TENANT SaaS PLATFORM** — Cloud / Distributed Systems

**Tech:** Node.js, Express.js, React, PostgreSQL, Docker, JWT, RBAC

- Developed a SaaS platform for managing teams and project activities.
- Designed the system to support multiple organizations while keeping tenant data separated.
- Implemented JWT authentication and role-based permissions.
- Built backend REST APIs using Node.js and Express.js.
- Used PostgreSQL for application data and Docker Compose for containerized development and deployment.
- Structured the application to support scalable multi-tenant workflows.

### **PAYMENT GATEWAY WITH HOSTED CHECKOUT** — FinTech / Payment Systems

**Tech:** Node.js, Spring Boot, PostgreSQL, React, Docker, REST APIs, UPI, Card Payments

- Developed a payment processing system with hosted checkout functionality.
- Built backend services using Node.js and Spring Boot.
- Implemented order creation and transaction management through REST APIs.
- Added support for multi-currency payment workflows.
- Integrated UPI and card payment flows.
- Implemented webhook verification for confirming transaction status.
- Used PostgreSQL for managing orders and transaction information.

## EDUCATION

---

**DEGREE IN INFORMATION TECHNOLOGY — IT OPTION** | Grets University | September 2016 – July 2018

**KENYA CERTIFICATE OF SECONDARY EDUCATION (KCSE)** | Rasul Al Akram Academy, Nakuru | March 2012 – November 2015 | Grade: Distinction

## ACHIEVEMENTS

---

- Top 100 National Team — HackerRamp, 2026.
- Solved 1,200+ Data Structures and Algorithms problems across LeetCode, CodeChef, and GeeksforGeeks.
- Built projects covering artificial intelligence, machine learning, SaaS architecture, payment systems, and full-stack development.
